Office Action Summary	Application No. 10/565,654	Applicant(s) TANIKAWA ET AL.	
	Examiner DAQUAN ZHAO	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21 and 25-28, drawn to an extension information obtaining unit operable to obtain extension information showing that broadcast of a program preceding the target broadcast program will be extended; a judging unit operable to judge, if the extension information is obtained, whether broadcast data being recorded after the scheduled broadcast time is segment data that is sufficiently shorter than the target broadcast program or program data; a monitoring unit operable to monitor, after the judging unit judges that the broadcast data is segment data, whether segment data of a same type is consecutively received; an extracting unit operable to extract, if the judging unit judges that the broadcast data is program data, an end time of a piece of segment data immediately preceding the program data, the extraction being performed when a predetermined condition is satisfied; and a start-position recording unit operable to record, as a start position of the target broadcast program, a position corresponding on the recording medium to the extracted end time., classified in class 386, subclass 46.
 - II. Claims 22-24, drawn to Display data for displaying image data included in a broadcast program recorded by a broadcast program recording apparatus that is for receiving and recording broadcast programs, the display data comprising: a thumbnail image corresponding to a piece of image data included in the recorded broadcast program; and a graphical

representation of a position of the thumbnail image relative to the entire recorded broadcast program., classified in class 348, subclass 333.05.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as Display data for displaying image data included in a broadcast program recorded by a broadcast program recording apparatus that is for receiving and recording broadcast programs, the display data comprising: a thumbnail image corresponding to a piece of image data included in the recorded broadcast program; and a graphical representation of a position of the thumbnail image relative to the entire recorded broadcast program. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
